Author Biographies

Kumar Utkarsh Singh is affiliated with PowerX Technologies, London, UK. He is a senior data engineer at PowerX. His work on this study involved conceptualisation, methodology, data curation, formal analysis, software development, visualisation, and preparation of the original manuscript. His contributions focus on data-driven modelling and the empirical evaluation of AI-enabled credit decision systems.

Jayasree Varadarajan is affiliated with the School of Geography, Geology and the Environment at the University of Leicester, UK. She is a lead in AI at IT company. Her contribution to this study includes methodology, validation, interpretation of results, and critical review and editing of the manuscript, with an emphasis on rigorous empirical analysis and interdisciplinary research.

Md Abu Sufian is a PhD researcher in Computer Science at the University of East London, UK. He is a lecturer at UEL and the Institute of Structural Molecular Biology, Birkbeck University of London, Birkbeck-UCL Joint. His research focuses on artificial intelligence, machine learning, explainable AI, multimodal modelling, and high-stakes decision systems, with particular experience in medical and cardiovascular AI. In this study, he contributed to conceptualisation, methodology, supervision, validation, development of the governance framework, and manuscript review and editing.

Md Aminul Islam Rana is affiliated with the Department of Computer Science at Northumbria University London, UK. He is a lecturer at Northumbria University London. His contributions include methodology, validation, interpretation of results, and review and editing of the manuscript, with a focus on evaluating and interpreting computational models.

Nadeem Qazi is affiliated with the Department of Computer Science at the University of East London, UK. He is a senior lecturer at UEL. His contribution to this study includes supervision, validation, interpretation of results, and critical review of the manuscript, particularly in relation to methodological robustness and the application of AI and data-driven systems.

Nabeela Berardinelli is affiliated with the Department of Computer Science and Digital Technologies, School of Architecture, Computing and Engineering, at the University of East London, UK. She is a senior lecturer at UEL. Her contribution to this study includes supervision, validation, critical review, and manuscript editing, with emphasis on research quality, methodological interpretation, and responsible application of computational methods.
